

Colour

Sensory Bag

You will need:

Ziplock clear bag

Paint – red, yellow, blue, white

Duct tape

Method

1. Squirt approximately 1 tablespoon each of the red, yellow, blue, and white paints into the bag.
2. Seal the bag, pressing out as much air as possible. Tape across the top of the bag. You may also wish to tape over all the sides of the bag to reduce the likelihood of the bag splitting.
3. Your child can enjoy squeezing and moving the bag to mix the paints together and create new colours.
